XENXO S-RING

Let's find the right size for your S-Ring.

Saying No to E-Wastes.

Xenxo tries to avoid the usage of biohazardous one-time plastic ring sizing kit. Thanks for your contribution towards preventing Nature from e-waste.

In just 3 easy steps.

By simply reading the tips & following the steps mentioned in the next page, you can identify your perfect ring size in just a few minutes.
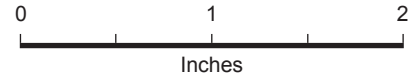

Let's get started!

One important step for accurate ring size

Prior to printing ensure that Page Scaling is set to "100%" on your print settings dialog box.

To double ensure the ruler proportion, check if the ruler guide on right is exactly 2 inches with your measuring scale.

```
0               1               2
|_____|_____|
              Inches
```
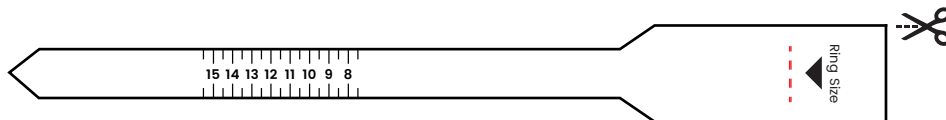

Ruler Guide

Step 1

Print this sheet & carefully cut out the paper ruler. Be sure to make a small slit at the end (dots marked red).

Step 2

Wrap the thin strip of paper around your finger and slide the pointed end through the slit.

Step 3

Read the number that lines up next to the slit. This is your ring size.

```
15 14 13 12 11 10 9 8            Ring Size    ✂
```

Paper Ruler

The Right Fit.

★ The paper around your finger must be not too tight, aim for a comfortable & snug fit.

★ For an accurate measurement, pull the sizer tight over the widest part of your finger. This could be the knuckle.

★ If you're between sizes, it's usually a good idea to choose the larger size.

★ The index, middle and ring finger usually work best. If Possible, choose a size that fits more than one finger.

★ Measure your ring size at the end of the day when your fingers are warm.
